Winter weather reminder

When the decision is made to delay opening the college in the morning (due to inclement weather), **ALL CLASSES PRIOR TO 10 a.m. ARE CANCELLED.**

Classes beginning at 10 a.m. or later will run as

scheduled. Announcements are made on local TV/radio stations and on Terra Alert and posted on Terra's home page.

If you haven't signed up for Terra's alert to receive emergency messages, I encourage you to contact Security as soon as possible to sign up. There is no charge for this message alert service but text-messaging charges from your cell phone carrier may apply.

When the college is delayed, it is for the safety of all of you. **Please remain off campus until the appropriate time so the Maintenance Staff can perform their tasks.** When you do come on campus, park in a lot that has already been plowed. We are fortunate that we have the parking facilities we do but be willing to adapt and park in another area if necessary. Chances are "your spot" will be available later in the day or the next day.

Your attention and consideration in this matter is greatly appreciated by the Maintenance Staff.

The program is May 23-27 at The Ohio State University. Women who are enrolled in any Ohio two-year or four-year college or university are urged to apply.

Five tips for success with midterms

Here are “5 tried and true tips for making it through midterms” from USA Today College:

1. **Take a walk.** Walking has been shown to boost memory, critical thinking skills and creativity.
2. **Get some sleep.** Sleep deprivation is known to impact attention and limit short-term memory – two traits that are necessary to succeed on exams and to focus on writing papers.
3. **And/or drink coffee.** If you can't reap the cognitive benefits of getting some extra sleep during midterms (or even if you can), caffeine is the next best thing.
4. **Join a study group.** Some people prefer studying alone and others frequently use study groups. But even if you tend to study by yourself, there are some likely benefits to working in study groups.
5. **Test yourself.** Since the process of testing yourself improves memory and information recall, simply having someone give you a practice test or giving yourself one will similarly improve information retention, preparing yourself for the real test.
